ULTRA-STATIC™ AUTOMATIC-LINE HOPPER

Powder Feed Hopper

220 lb · 300 L

The Ultra-Static™ 220 lb. stainless steel hopper is designed for automatic lines. The hopper latches to the booth for direct vent or through a hose. The break-apart construction facilitates cleaning or changing the membrane. The pumps are top mounted.

DESIGN FEATURES

Hopper Capacity	Nominal 220 lb. (300 liter) capacity, custom made to order
Stainless Steel Hopper Body	Formed and welded, easy to clean design
Modular Lid Assembly	Hinged and gasketed cover for easy powder access
Hopper Options	Customize the hopper to match your needs or existing models: • Hopper vent designs: 2-1/2″ dia. vent hose outlet or direct vent to booth collector • Powder level probe wells: top or side mounted dry well for sensor probes • Powder receiver: separator for extracting compressed air from transferred powder • Rotary screener hose intake flange: connects hopper to screener
Pump Mount Adapters	The lid accommodates up to (16) pump mounts
Break-Apart Construction	Powder coated air plenum with bolt style latching
Caster Mounted	Various swivel caster options for easy maneuvering
Fluidizer Membrane	Removable and gasketed 1/2″ membrane
Pump Mounts with Pick-Up Tubes	Specify quantity and brand of pumps used
