ULTRA-STATIC™ MANUAL SYSTEM

Manual Powder Gun with Round Hopper

40 lb · 50 L hopper

The Ultra-Static™ manual system combines the preferred equipment technology: operator easy-to-use design, uncompromising safety features, precision and reliability, and an exceptional powder cloud spray pattern. The manual gun has good balance and many nozzle attachments to tackle the most challenging coating tasks, and is designed for rapid color change. The TX3 Digital Controller has user-defined preset program functions for Normal, Corner and Re-coat, as well as a memory recall of a special setting.

The nominal 40 lb. (50 liter) capacity stainless steel hopper is designed for fast and easy color change, with easy break-apart construction for contamination-free color changes.

DESIGN FEATURES

TX-3 Electrostatic/Pneumatic Gun Controller	User friendly, with programs for any coating condition
MEP-3 Manual Electrostatic Gun	100 kV negative
Round Spray Nozzle Sizes	18, 25 & 32 mm dia.
Fan Spray Nozzles	Flat fan spray
Hopper Dimensions	15″ diameter × 24″ high
Stainless Steel Hopper Body	Seamless welded design with formed handles on the sides for lifting and handling the hopper. The hopper interior and exterior has NO hardware, gaskets or fasteners to trap powder or cause snagging while cleaning.
Removable Lid Assembly	The hinge-less stainless steel lid assembly has a lift handle and wide opening for fast filling. The (2) pump mount holes and vent hose connector are located on the top.
Air Plenum Pan	Powder coated, break-apart construction with draw latches
Fluidizer Membrane	Removable 1/4″ thick Teflon™ porous membrane with U-channel rubber gasket
Powder Feed Pump	Quick-disconnect connectors at the pump and at the cart. High-efficiency Venturi design.
Set of Powder Hose	High-flow clear hose for manual guns
Assembly Hardware	Poly-tubing, hardware and cable ties
